Subject: what to do with microsoft

Microsoft has proven to be an anti competitive company. its actions benefit only microsoft.

i believe that:

1. linux should be brought to all of the schools in the u.s
2. microsoft should transfer a few bilion dollars to companys like netscape (companys that they caused damage to by using the ms os monopoly)
- 3.there should be greater government support of open source companys (not only moral support...)
- 4.make companys that sell computers sell them with other operating systems.
5. restrict production of microsoft software.
- 6.give microsoft heavy fines.
7. take out the i/e from the os
